# OSHO MULTI-DIMENSIONAL COUNSELING GROUP

Osho Multiversity is now offering a comprehensive, personal analysis of an individual's unique needs for personal growth and transformation. A select gathering consisting of a senior physician, therapists, body workers, counselors, healers and psychic readers, each spends an hour or two with you. During this time each develops his or her personal insight into your specific requirements.

Then they meet, in a private and confidential round-table conference, to specially design a curriculum of experiences to cut through to the heart of the essential life issues facing you now, and enable you to make the 180-degree turn towards transformation.

Never before has such a diverse group of scientists and visionaries gathered to look at individuals and their personal situations.

This is the wonder of Osho, the vastness of his vision. From the allopathic physician to the seer, from the earth to the sky, this body and other bodies, this dimension and other dimensions.

This is what diagnosis will be in the 21st century.
